Professional Summary

BCA student and Technical Lead at Inovus Labs IEDC with hands-on experience in web development, embedded systems, automation, and self-hosted infrastructure. Experienced in building IoT solutions, managing technical projects, and deploying containerized applications using Docker and Kubernetes. Passionate about learning new technologies and creating practical solutions that combine hardware and software.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

Kristu Jyoti College of Management and Technology, Kerala

Affiliated to Mahatma Gandhi University

Experience

Technical Lead

Mar 2025 – Mar 2026

Inovus Labs IEDC, Kerala

- Lead development of embedded systems, web applications, and automation projects.
- Mentor team members and coordinate technical implementation.
- Drive adoption of modern development and deployment practices.

Project Manager

Mar 2024 – Mar 2025

Inovus Labs IEDC, Kerala

- Managed project execution from planning to delivery.
- Coordinated teams and project timelines.
- Contributed to hardware prototyping and product development activities.

Intern

Oct 2023 – Mar 2024

Inovus Labs IEDC, Kerala

- Worked on web development, UI design, and Arduino-based projects.
- Assisted in prototyping and technical experimentation initiatives.

Technical Skills

Languages: C, C++, Python, JavaScript

Web Development: React, HTML, CSS, Node.js, Express.js

Embedded Systems: Arduino, ESP32, Embedded C++, IoT Development

DevOps Infrastructure: Docker, Kubernetes (k3s), Linux, Apache, Nginx, Self-Hosting, Homelab Administration

Automation: n8n

Databases: MySQL, Firebase

Tools: Git, GitHub, VS Code, Figma, Adobe Photoshop

Projects

Gibberish — Anonymous Messaging Platform

Built a private messaging platform focused on anonymous communication using Node.js, JavaScript, HTML, and CSS.

Tech: Node.js, JavaScript, HTML, CSS

GitHub: github.com/Sane-Sunil/Gibberish

Stego Canvas — Steganography Tool

Developed a web-based tool that hides files inside images using browser-side processing and steganography techniques.

Tech: React, JavaScript, CSS

Live Demo: stego-canvas.netlify.app

Water Analysis System

Designed an IoT-based water quality monitoring system using ESP32 and Firebase for automated data collection and visualization.

Tech: ESP32, Firebase, JavaScript, HTML, CSS

Personal Weather Data Station

Built a weather monitoring system using ESP32 and DHT11 sensors to collect and display real-time environmental data.

Tech: ESP32, DHT11, Firebase

EV Bike Conversion

Converted a petrol-powered motorcycle into an electric vehicle through electrical integration, mechanical modifications, and extensive testing.

Tech: Electrical Systems, Mechanical Integration

Homelab Infrastructure

Built and maintained a self-hosted infrastructure environment running containerized services with Docker and Kubernetes (k3s), including web servers and reverse proxies.

Tech: Linux, Docker, k3s, Apache, Nginx

Areas of Interest

Cloud Computing • DevOps • Embedded Systems • Open Source • Automation • Self-Hosting
